

## Computers: Inside & Out

### Outer Hardware Input/Output Worksheet

Remember: Output devices receive information from the computer and translate it into sound or images we can see and hear through the different computer components.

Input devices allow us to send information into the computer to tell it what to do.

---

Directions: Look at the list of components below. Write INPUT or OUTPUT on the line next to each device. Turn your paper over when you are finished.

1. Monitor \_\_\_\_\_
2. Keyboard \_\_\_\_\_
